Dear Jessica: I am writing on behalf of the Wastewater Commission in regard to the plan for septic treatment for the Southern Tier project. If it is within your jurisdiction, we would like a condition that the project be hooked up to municipal sewer should it be available at the completion of phase one of the project for health and environmental reasons. Municipal sewer hook up is included in the Comprehensive Wastewater Management Plan for this housing project and would remove significantly more nitrogen than an enhanced on site system.

Thank you,  
Gail Barmakian
